

Bandit 0 is pretty easy and basic. It requires basic knowledge of the ssh tool. The page states that to start we need to ssh into host **bandit.labs.overthewire.org** on port 2220 through the username **bandit0**. We do this by using the ssh command with the following syntax:

```
ssh username@hostname -p port
```

Then we enter the password given, which is bandit0.

```
((base) → ~ ssh bandit0@bandit.labs.overthewire.org -p 2220
This is a OverTheWire game server. More information on http://www.overthewire.org/wargames
bandit0@bandit.labs.overthewire.org's password: ?
```
